

Wa

-Company Philosophy, Japanese culture-

Using the Japanese cultural values of “harmony”, “peace” and “balance”, we plan to expand our business “walking side-by-side” not only with our fellow employees but with our client companies and the people of our community.

We anticipate the changing needs of the logistic industry and offer flexible support to resolve our customers' problems.

We strive to get an early sense of customers' needs and to revise/change our support.

Our aim is to create a workplace where the aims of the customer can anticipate.

We believe that work provides a constant sense of accomplishment, and that the satisfaction and gratitude that come from it are linked to each individual's creation of goals and love of challenges.

We constantly strive to create a sense of accomplishment and gratitude in the work we are provided.

We believe that work provides a constant sense of accomplishment, and that the satisfaction and gratitude that come from it are linked to each individual's creation of goals and love of challenges.

We make serious efforts to conserve energy and resources, and strive to improve customer satisfaction.

Aiming to sustain and improve the earth's environment, we are expanding our environmental efforts not only in Japan but also to overseas locations.

"Wa" -promoting technologies to the world

In partnership with YPS (Thailand), we are expanding our production base from Japan to Thailand and offer support for customer production activities globally.

Since our business partnership with YPS Thailand in 2014, we are engaged in overseas procurement and production.

By enabling the use of Japan's technology and precision in Thailand, a broad range of business proposals are now possible, including pallet production in Thailand.

Since products are being manufactured locally as well, not only are goods being imported from Thailand to Japan but production of pallets used in Thailand and neighboring countries is also ongoing.

HIROSHIMA PS & YPS CORPORATE PROFILE

Corporate Profile

Company name Hiroshima PS Co., Ltd. / YPS(THAILAND) Co., Ltd.
Main business 1. Material handling equipment production and logistics planning design, and manufacture of transport machinery and various types of machines, equipment, and containers
3. Import/export, processing, and sale of steel materials, special metal, and various materials

Hiroshima PS

Location 1650-2 Kuba, Fukutomi-cho, Higashi-Hiroshima, Hiroshima Prefecture, 739-2303, Japan

Jul. 2015 Local office/manufacturing division established.
Oct. 2015 Exchanges with Hiroshima University FEP begin. Shift to industrial and regional development.
Apr. 2016 Overseas procurement and production begin.

Content of Operations

Centering on metal processing, we engage in material handling equipment production and logistics consulting, and cover all types of manufacturing, from automobile part transport carriages to semiconductors, food machinery, industrial machinery, and electrical equipment. In recent years, applying the expertise and technology that we have acquired up to now, we have been engaged in the development of AGV equipment for high-efficiency logistics and material handling environments, as well as the design of shipping pallet mechanisms and other efforts. Emphasizing consistent quality, we give our best to meet all of our customers' needs in a timely manner, from planning/design to fabrication, and from trial manufacture to verification and mass production. **For any type of processing work, consult first. Please give us a call. We as a staff look forward to hearing from you.**

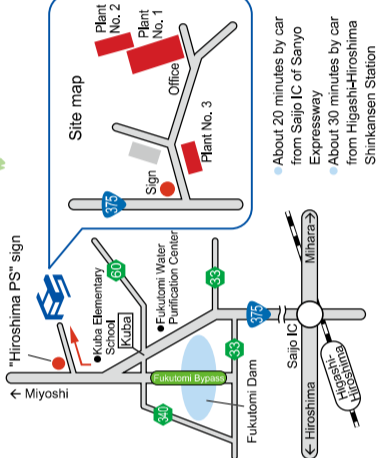

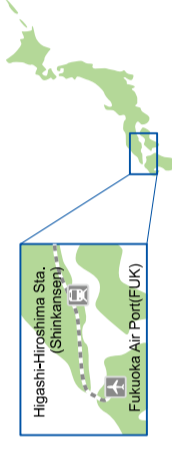

Quality Policy

"To ensure customer satisfaction, each of us will put quality first in everything we make."

Basic guidelines

- ◁We will comply with requirements and continuously improve OMS effectiveness.
- ◁Each of us will have initiative and will properly carry out what we have decided to do.
- ◁We will put forth quality guidance that improves execution ability.
- ◁We will put the law first.
